NEWS RELEASE

FOR IMMEDIATE RELEASE

**NATION'S FIRST INSTALLATION OF BIKESTATION SECURE BIKE
MODULES CONTRACTED FOR COVINA, CALIF.**

Bike Transit Center Fits City's Plan for Sustainability

LONG BEACH, Calif., Oct. 26, 2009 -- The nation's first [Bikestation Secure Bike Module](#), a new concept in cost-effective, compact, multi-use [bicycle transit center](#), is contracted for installation at the Covina Metrolink station in Covina, Calif. According to Andrea White-Kjoss, president and CEO of [Mobis/Bikestation](#), the company that plans, designs, implements and operates [alternative multimodal transit systems](#) across the U.S., "The new bike modules overcome a top concern people have that keep them from using their bikes -- theft." The new Bikestation Covina Secure Bike Module is 10 x 25 square feet of high tech, "green" design offering 36 secure parking spaces to accommodate up to 80 users through digital access.

The Bikestation Secure Bike Module will be announced at a Groundbreaking Ceremony by Covina Mayor Walter Allen at Bikestation Covina on Tuesday, October 27, 2009 at 6:00 PM. Daryl Parrish, city manager, Covina, Calif. stated, "The new Bikestation Secure Bike Module is directly in line with the strategic plan for the City of Covina. We're actively developing environmentally sustainable programs that both serve the health and convenience of our citizens and reduce our carbon footprint. While some of these programs can take a long time to implement, the Bikestation is a fast, cost-effective project that can benefit the people of Covina right away. This is also an example of a truly effective public/private partnership that we expect to see more of across the U.S. We're proud to be a leader in California's push to [alternative transportation](#)."

Bikestation Covina, expected to be in operation by the late fall of this year, will feature monitored electronic security. Users can sign up at www.Bikestation.com or over the phone, and their access key fob will allow them not only to use Bikestation Covina but any Bikestation in the U.S. There are expected to be 200 Bikestations in operation within the next five years. While Covina will start with a single Secure Bike Module, the LEED 3.0-compliant design is scalable, allowing the city to add to the facility or add new Modules when required.

Mayor Walter Allen of Covina said, "Covina has one of the busiest Metrolink stations in Southern California. For over 10 years, our city council has worked hard to develop innovative options in transportation. Our new Bikestation Covina Secure Bike Module will allow Covina residents to bike to the station for transportation and recreation. It reduces the need for parking, improves people's health, and lowers emissions, and the clever, innovative design of the module fits right into the look of our downtown. The Bikestation is good for the environment and for the people of Covina."

The City of Covina Metrolink Station is the third busiest station in the Metrolink system, serving 15 cities in the eastern San Gabriel Valley, with average weekday annual boardings of 204,000 commuters. Bikestation Covina adds bike transit infrastructure that makes using mass transit more convenient and feasible for more people, more often.

About Mobis Transportation/Bikestation

[Mobis Transportation/Bikestation](#) is a consulting, development and management firm that helps clients develop sustainable bicycle and other alternative [multimodal transportation](#) infrastructure systems from inception through construction, operations and maintenance. It was founded with the goal to reduce [traffic congestion](#) and [vehicular emissions](#), improve access to mass transit and offer meaningful mobility choices. Mobis helps clients make the most of every transportation and development dollar by leveraging those investments -- bringing them more customers for less. With over 13 years experience and deep operational expertise, Mobis stands apart as one of the world's leading experts in making multimodal transportation a reality. Mobis operates a network of innovative transportation facilities through [Bikestation](#), [CityWheels](#) and [City BikeShare](#) brands. Bikestation creates the only turnkey ecosystem for bicyclists and bicycling. Bikestation facilities offer secure bicycle parking and related services to make cyclists' lives easier, including repair services, equipment and accessory sales, restrooms and showers. Mobis/Bikestation has headquarters in Long Beach, Calif. More information on Bikestation can be found at www.mobisinc.com and www.bikestation.com, by calling 562-733-0106, or by e-mailing info@bikestation.com.
